## Foober

Your bones don't break, mine do. That's clear. Your cells react to bacteria and viruses differently than mine. You don't get sick, I do. That's also clear. But for some reason, you and I react the exact same way to water. We swallow it too fast, we choke. We get some in our lungs, we drown. However unreal it may seem, we are connected, you and I. We're on the same curve, just on opposite ends.

Now that there is the Tec-9, a crappy spray gun from South Miami. This gun is advertised as the most popular gun in American crime. Do you believe that shit? It actually says that in the little book that comes with it: the most popular gun in American crime. Like they're actually proud of that shit.

Now that there is the Tec-9, a crappy spray gun from South Miami. This gun is advertised as the most popular gun in American crime. Do you believe that shit? It actually says that in the little book that comes with it: the most popular gun in American crime. Like they're actually proud of that shit.

The path of the righteous man is beset on all sides by the iniquities of the selfish and the tyranny of evil men. Blessed is he who, in the name of charity and good will, shepherds the weak through the valley of darkness, for he is truly his brother's keeper and the finder of lost children. And I will strike down upon thee with great vengeance and furious anger those who would attempt to poison and destroy My brothers. And you will know My name is the Lord when I lay My vengeance upon thee.

## 2.1 Explanation

## 9/9/2011 **Explanation**

Just to make sure that everybody knows whats going on...

As you might know, I am doing my MSc. in The Netherlands, at the Delft University of Technology. Last year I found out that our faculty has several agreements with universities all around the world regarding exchange programs. Well, that naturally caught my attention so I started thinking about going further abroad for another semester. I have decided to go to Asia, because Europe does not make sense for me and I did not feel like going to the USA or another English-speaking country. Moreover, the Asian culture is so different from Europe that any experience with it might be very valuable. There were basically three choices — Harbin in China, Tokyo in Japan and Seoul in Korea. Because Harbin was only for two months and Japan is quite expensive and maybe a little too <del>weird</del> different, I have decided to come to KAIST Business School in Seoul, which is a MBA oriented part of the otherwise technically oriented KAIST university in Daejeon.

The application and organization was a bit of a struggle, but luckily everything worked out fine and I was admitted to the Fall 2011 Exchange program. I am focusing mainly at Information and Media MBA, which is in line with my planned master thesis direction. I will spend 4 months here and then come back to Delft to start working on my master thesis. So, that's why I am here and not in Europe. Simple, right... Created on 9/9/2011 at 13:25:57
